IAPNRC BASIC BRONCHOSCOPY COURSE - BATCH 3

Indian Academy of Pediatrics, National Respiratory Chapter (IAP-NRC), is actively involved in enriching and expanding the knowledge and practice of pediatricians in Pediatric Respiratory Medicine across the country. Flexible Bronchoscopy is emerging as one of the important procedures in the practice of Pediatric Pulmonology. IAP-NRC aims to provide skill enhancement and expertise in this procedure, to ultimately improve the diagnosis and management of pediatric respiratory diseases.

BBC is devoted to imparting basic knowledge and proficiency in the art & science of Pediatric Flexible Bronchoscopy. The course is aimed for pediatricians with specific interest in pulmonology and pediatric pulmonologists. The highlights of the program are as follows:

- The course will have **12 pre-recorded, online lectures on “Learning management system”**, once a week. Lectures will be available to registered candidates for the entire duration of the course.
- Once a week, **online tests** based on the content of the previous session would be conducted along with live doubts solving sessions.
- **OCS (online contact sessions)**, i.e. live doubt solving classes in addition to the pre-recorded sessions would be held on Tuesdays (9 pm – 10.15 pm), once in 2 weeks, and add-on sessions (on sos basis) – Fridays (9 pm – 10. pm). In these sessions, MCQ questions of the previous 2 sessions would also be solved.
- Updated **reading material** would be given to all course participants
- **80% attendance** mandatory (This is also assessed on LMS system) – for exit exams
- After online sessions, a **2 days physical contact session** will be held at FMRI GURUGRAM on 10th and 11th October 2026.
- PCS will have 2 days of Summary lectures / Hands-on / Exit exam / Gold medal for the best performer (at the end of course)
- Each batch will have a maximum of **50 delegates**
- Course fee – **20,000/- INR (not refundable)**.
